Snyk found two vulnerabilities:

- [github.com/satori/go.uuid](https://github.com/satori/go.uuid),
- [github.com/dgrijalva/jwt-go](https://github.com/dgrijalva/jwt-go)

To solve these security risks, we replaced the two dependencies with:

- [github.com/gofrs/uuid](https://github.com/gofrs/uuid),
- [github.com/form3tech-oss/jwt-go](https://github.com/form3tech-oss/jwt-go)
